- COMPOUNDING

Pharmaceutical compounding is the science of preparing custom medications to fit the unique needs of a patient. Since not all patients can adhere to prescribed medications, at Surecare Specialty Pharmacy our trained pharmacist can work alongside the provider and patient to come up with an alternative – compounded medications.

At Surecare Specialty Pharmacy, we offer **Non-Sterile** compounding. Non-sterile refers to medications similar to creams and gels that are compounded in a safe environment.

Case 3:18-cv-01234 Document 1-30 Filed 11/02/18 Page 1 of 3 PageID #: 1132

We are currently updating our clean room facilities to meet changes in standards and regulations – at which time we will continue to offer sterile compounding for our patients.

Once the medication has been compounded, it is filled and sent out to the patient. Again, regular follow-ups are made with the patient to determine the efficacy of their compounded medication and to see if there were any side effects that need to be noted.
